

GENERAL CONDITIONS OF USE OF VISITORS' MOORINGS IN CARRICK CASTLE

- The blue visitors' moorings in Carrick Castle are owned by the Carrick Castle Boat Club.
- The club's visitors' moorings are identified by the two blue hippo-type buoys, both with yellow pickups and are clearly marked.
- Please **DO NOT** pick up any private moorings in the area. Their capacities may not be available and their condition may be unknown. Members have provided visitors' moorings to make this action unnecessary.
- At the time of being laid, these visitors' moorings were considered suitable to be used by vessels of 15 tonne maximum displacement as marked.
- These visitors' moorings are serviced annually in the spring.
- Visitors' moorings are available on a first come, first served basis.
- The decision as to whether a particular mooring is suitable for a vessel of a certain size and weight, in different weather conditions, is for the owner/skipper of the vessel to judge.
- By securing a vessel to one of these visitors' moorings, the vessel's owner/skipper warrants to the mooring owners that their vessel carries valid insurance cover for any claims arising out of the use of the said mooring.
- Vessels using these moorings must have third party liability insurance with a minimum value of £3 million.
- These visitors' moorings are provided as a courtesy to visiting vessels. It is not recommended that vessels are left on visitors' moorings unattended.
- The owner/skipper of a vessel using a visitors' mooring will be liable to a charge of £10.00 per day/night. Payment instructions are on blue tags on the pick up buoys.
- The visitors' moorings may be used for lunch stops between 11.00 & 14.00 hrs free of charge.
- WiFi Internet access is provided for the use of vessels using the club's visitor's moorings only.
- All users of the visitors' moorings do so entirely at their own risk.
- Carrick Castle Boat Club Moorings Association reserve the right, entirely at their discretion, to require visitors to remove their vessels from any of the visitors' moorings.
- Please be careful on your approach to the moorings, avoiding the shallow water area around the 'Perch' Channel Navigation light.
- Please show consideration to other users by not exceeding 4 knots within the anchorage and mooring areas.
